

REMARKS

Claims 1, 3, 5 and 6 were rejected and claims 2 and 4 were objected to as being allowable if rewritten in independent form. Review and reconsideration on the merits are requested.

Claims 1, 3, 5 and 6 were rejected under 35 U.S.C. § 102(e) as being anticipated by U.S. Patent No. 6,800,330 to Hayashi et al. The Examiner cited Hayashi et al. as disclosing a coating composition for producing silica-based films substantially as claimed, comprising silicon compounds, solvent and polyoxyalkylene.

In response, claim 1 has been amended to delete “polyalkyleneoxide structure” from among the members represented by (C). That is, the coating composition of amended claim 1 comprises a hydrolyzate and/or partially condensed product (A), (B) a solvent for coating, and (C) at least one selected from the group consisting of a void-forming solvent (allowable claim 2) and hollow polymer fine particles (allowable claim 4). Claim 3 has been canceled. Claims 5 and 6 have been amended to depend from any of claims 1, 2 and 4.

Claims 2 and 4 have been amended to employ the art-recognized open-ended language “comprises” with respect to the void-forming solvent or hollow polymer fine particles of component (C).

Additionally, claim 1 has been amended to recite that $1 \leq n + m \leq 3$. Notably, because n is an integer ranging from 0 to 2 and m is an integer ranging from 1 to 3, $n + m$ can never be 0. No new matter has been added.

Entry of the amendments, withdrawal of the foregoing rejection and allowance of claims 1, 2, 4, 5 and 6 is earnestly solicited.

AMENDMENT UNDER 37 C.F.R. § 1.111
